

Here's the state of the art in low-cost hard-disk computers

11 MEGABYTES OF

FAST HARD-DISK STORAGE

Yes, the Cromemco Model Z-2H is in a class by itself in the computer field.

These Z-2H features tell you why:

- 11 megabytes of hard-disk storage
- 64 kilobytes of fast RAM
- Two dual-sided floppy disk drives
- Z-80A type processor
- Fast 4 MHz operation—150 nanosecond access time
- Fast hard-disk transfer rate of 5.6 megabits/second
- Low cost

And that's not all you get. Not nearly.

BROAD SOFTWARE SUPPORT

You also get Cromemco software support—the broadest software sup-

port in the microcomputer field. Software that Cromemco is known for. Like this:

- Structured BASIC
- FORTRAN IV
- RATFOR (RATional FORtran)
- COBOL
- Z-80 Macro Assembler
- Word Processing System
- Data Base Management

And more all the time.

FIELD PROVEN

The Z-2H is clearly in a class by itself. We introduced it last summer. It's field proven. It's reliable.

And it's rugged. Housed in a sturdy, all-metal cabinet.

EASILY EXPANDABLE

As always with Cromemco, you get expandability. The fast 64K RAM in this Model Z-2H can be expanded to 512 kilobytes. That amount of RAM combined with 11 megabytes of hard-disk storage gives you enormous

computer power—the equal or even beyond what much larger computers sometimes offer.

What's more, this computer gives you a 12-slot card cage. That's to plug in your special circuits as well as additional RAM and interface cards.

This expandability is supported by still more Cromemco value—the Z-2H's heavy-duty power supply that gives you 30A at 8V and 15A at $\pm 18V$ to support plug-ins.

LOW COST — SEE IT NOW

The Z-2H is real. It's been in the field for many months. It's proven itself.

You should see the Z-2H now. Contact a Cromemco representative and arrange for a demo. Learn that Cromemco is a survey-winner for reliability.

And learn that the Z-2H is under \$10K.

In the long run it always pays to get the best.
